rRNA Intra-oral Sprays

# Revolutionary

Unique, highly effective and prescribed by health care practitioners in over fifteen countries, Results RNA® Intra-oral sprays represent the forefront in detoxification and RNA based nutritional technology.

## Why Sprays?

Water is the essence of life dominating the chemical composition of all organisms. Serving as the fulcrum of biochemical metabolism, aqueous mediums embody the most efficient means of nutrient delivery. The percentage of usable nutrients made available to the body by Results RNA® Intra-oral sprays is much higher than capsules, pills or dermal transfer methods as depicted in the chart below.

### DELIVERY METHOD EFFECTIVENESS

90%+	Intra-oral Sprays
75%	Intra-Muscular Injection
55%	Sublingual (Under-the-tongue) Liquid
40%	Trans-dermal Patch
20-25%	Gel Capsule
0-10%	Pill

## The New Protocol

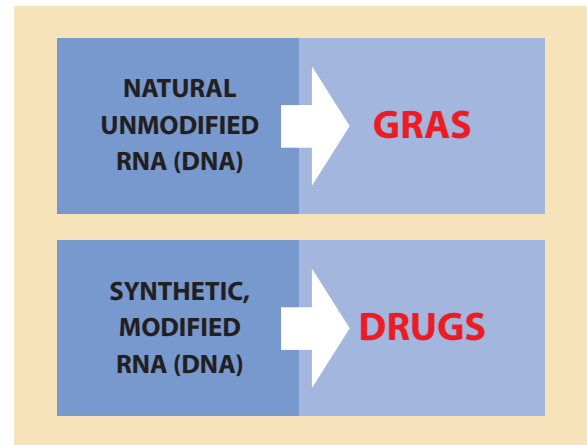

Cytotoxicity and genetic susceptibility are the underlying causes of nearly every disease known.

Advanced protocols are now available. Total Body Burden (TBB) of pathogens and toxins can be safely and significantly reduced, while vital RNA based nutrients correct cell signaling, providing system specific building blocks of cellular metabolism and mitosis.

*“Studies show that ACS 200® achieves significant 99.9999% kill against MRSA in less than one minute!”*

## rRNA Intra-oral sprays Specific Therapeutics

Ribosomal RNA (rRNA) is the central component of the ribosome; the protein manufacturing machinery of all living cells. Substantial empirical evidence proves that natural, unmodified RNAs can be utilized with exquisite specificity to successfully improve a wide range of health conditions. Natural RNA is also Generally Regarded as Safe (GRAS) by the FDA.

## Comparing Treatment Methodologies

Allopathic, synthetic RNA does not break down. This leads to heavy toxic burden in the body resulting in severe side effects. One distinct advantage when comparing natural RNA with a drug or synthetic RNA is that all of the breakdown components are healthy. Natural RNA (DNA) breaks down into nucleotides and ribose.

Small molecule drugs like statins bind not only to the molecules to which they are intended, but also bind to similar molecules. This is just one reason why small molecule drugs have so many side effects. However, the lock and key binding mechanism of RNA is very specific, binding only with the molecules to which they are intended.

Formulated using a proprietary plant-based nutrient extraction process, rRNA Intra-oral sprays comprises a complete line of effectively focused RNA based formulas ranging from Allergy Care® to Pure Energy® delivering safe, powerful results.

## Total Body Detox® Eliminate Pathogens and Toxins

Advanced Cellular Silver (ACS) 200® and Advanced Cellular Zeolite (ACZ) nano® comprise Total Body Detox® the combination of which effectively relieves acute and chronic infections while eliminating heavy metals and neurotoxins.

The overwhelming success of this approach supports the premise that chronic infections cause inflammation; efficiently binding toxic metals like lead, mercury, aluminum, antimony, arsenic, cadmium in the body, making it extremely difficult for any agent to remove them, which in turn leads to further immunodeficiencies and a downward spiral that must be reversed.

Provably the most effective antimicrobial available; ACS 200® is anti-fungal, anti-viral and bactericidal, thereby reducing pathogen burden and chronic inflammation. In unison, ACZ nano® binds and expels heavy metals, neurotoxins and free radicals providing an unparalleled two part solution for total body detoxification.

## The Core Four® A Multifactorial Approach

*Stress + Infectious Microbes + Toxins + Genetic Susceptibility = Multifactorial Disease.*

The Core Four® formulas supply the intrinsic requirements of cytodetoxification and metabolic health. These are: ACS 200®, ACZ nano®, Allergy Care® and Pure Energy®. The combinatorial effect of The Core Four® has demonstrated profound benefit on a wide range of patients.

## Prepare for Success

Safe and effective Results RNA® Intra-oral sprays can be prescribed in any combination as treatment and prophylaxis providing positive results without danger of complex interactions or side effects associated with traditional pharmaceuticals. Please see our products guide to discover which Results RNA® formulas are right for you and your patients.

## Practitioners Only Wholesale Pricing

## Total Body Detox® - Eliminate Pathogens and Toxins in Unison

Advanced Cellular Silver (ACS) 200® and Advanced Cellular Zeolite (ACZ) nano® comprise Total Body Detox® the combination of which effectively relieves acute and chronic infections while eliminating heavy metals, chemical toxins and free radicals. The overwhelming success of this approach supports the premise that toxic body burden causes immunodeficiency; leading to chronic infections which in turn cause inflammation; efficiently binding toxic metals like mercury, lead, aluminum, antimony, arsenic, cadmium and so on in the body, making it extremely difficult for any agent to remove them.

Inflammation is an important factor leading to most disease states. ACS 200® eliminates infectious microbes, thereby reducing chronic inflammation. Heavy metals and chemical toxins are then effectively harnessed and expelled from the body using ACZ nano®.

## Advanced Cellular Silver (ACS) 200® - Powerful Immune System Support. Anti-fungal, Anti-viral, Bactericidal

ACS 200® Intra-oral spray has been independently proven to be the most powerful antimicrobial available today achieving significant kill against Methicillin-resistant Staphylococcus aureus (MRSA) in less than 60 seconds. When choosing an antimicrobial product, safety and efficacy are the only two factors that truly matter. ACS 200® provides 200 parts per million of uniquely energized silver molecules that range in size from 0.4 microns down to nanometer, which are suspended in wetter water®; a proprietary micronutrient transport medium that is 43% lower in surface tension, enabling a more rapid penetration through all biological systems. If you have enjoyed any amount of success with another Silver-based product, you will love the patient success you can achieve using ACS 200®. We guarantee ACS 200® to be the most effective silver-based antimicrobial you have ever tried or your money back.

**Advanced Cellular Zeolite (ACZ) nano® – Powerful Detoxification. Eliminates Heavy Metals, Neurotoxins, Free Radicals**

ACZ nano® Intra-oral spray represents the forefront in chelation technology. Zeolite is a naturally occurring crystal formed from volcanic ash over 300 million years ago. This crystalline compound has a cage-like, honeycomb structure, which is negatively charged and therefore attracts and captures harmful, positively charged substances. With each dose of ACZ nano®, near countless numbers of sub micron size zeolite crystals enter the body as energized, negatively charged cages. As these crystal cages travel through the blood stream, positively charged toxins attach to the zeolite crystal cages in an action similar to a magnet attracting iron filings. These toxin filled cages then pass naturally out of the body after only 5 to 7 hours. Studies show ACZ nano® has the perfect molecular structure for capturing and removing damaging chemicals, free radicals and heavy metals from the body including mercury, lead, arsenic, cadmium, aluminum, tin and more. ACZ nano® employs nano size and significantly greater number of zeolite crystals per dose providing 250 times the effective surface area of the leading zeolite products. A unique detoxification supplement for immune system health\*
